DETAILED ACTION

Acknowledgement of Amendment

The amendment to the instant application was entered on 23 January 2007.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In the Claims

Claims 1-6, 8, 15-17 and 19: have been canceled.

Election/Restrictions

This application is in condition for allowance except for the presence of claims 1-6 and 8 directed to a method for detecting moisture, and claims 15-17 and 19 directed to a moisture detector, both groups non-elected without traverse. Accordingly, claims 1-6, 8, 15-17 and 19 have been cancelled.

Allowable Subject Matter

Claims 10-13 and 21-25 are allowed.

The following is an examiner's statement of reasons for allowance:

As to claim 10, the prior art of record fails to teach or reasonably suggest the organic luminescent display device including all the limitations of claim 10, specifically at least one moisture detector placed in a predetermined location close to the display elements, the moisture detector including a material layer including metal formed between a first electrode and a second electrode.

Claims 11-13 and 21-25 are allowable for the reasons given for claim 10, and for depending on claim 10.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

As discussed during the telephonic interview with the applicant's representative Mark J. Marcelli and primary examiner Mariceli Santiago, the rejections of claims 10-13 and 21-25 have been withdrawn. The examiner concedes that the metal layers of Izumizawa (U.S. 6,635,988 B1) are not in fact electrodes. The examiner concedes that there is no motivation to combine the organic luminescence display device of Kobayashi (J.P. 2003-157979, A) with the moisture detector of Sudoh et al. (U.S. 4,344,062).
